Can your product be healthier?

Are you taking advantage of current market trends?

About SARDI Food Safety & Innovation

SARDI Food Safety and Innovation is a unique multifaceted group of scientists providing scientific and technical expertise along the entire food supply chain of major food commodities. This one-stop-shop approach offers quick responses to companies to support profitability of the South Australian agricultural and food sectors. In addition to the food technology capacity described overleaf, we also offer the following expertise:

- Risk assessment
- Technical market access assistance
- Experimental design and statistical analysis
- Microbiological and molecular services
- Evaluation of rapid diagnostics
- Process control

FOOD INNOVATION AT SARDI

The **SARDI Food Technology team** aims to increase the profitability of the South Australian food sector. We have a proven track record of generating substantial benefits and value to the South Australian food industry and its stakeholders.

The team receives core funding from PIRSA agriculture, Food and Wine. Under this arrangement, we can work with SA food businesses to overcome minor issues and provide advice on further improvements.

The SARDI Food Technology team also conducts research and development on a fee-for-service basis and can offer advice on funding opportunities to support innovation in their business.

Initial consultations are free for South Australian companies.
