

# Kangaroo Island 1B registration workshops

## Have you signed up to One Biosecurity yet?

One Biosecurity (1B) is South Australia's new on-farm biosecurity management program that helps livestock producers to register, manage and promote their farm biosecurity plans and farm biosecurity rating.

A series of small group sessions across Kangaroo Island are being held to help producers get connected with One Biosecurity.

Bring your iPad, tablet or laptop. Internet access (WIFI) will be supplied, along with an expert from PIRSA's Biosecurity SA team to guide you through the registration process. Attendees will also need to have email access during the workshop to verify registration.

- **Parndana**  
Tuesday 21 May, Health Centre at Lions Park
