

Fisheries Management Act 2007
Sections 72, 76, 77 & 78

APPLICATION FOR A MINISTERIAL PERMIT VARIATION

With this completed application:
(Please tick when complete)

- ☐ If in a company name, I have attached an ASIC full company search extract, which lists all company directors (dated no older than 3 months).
- ☐ I have checked whether the variation will occur within an aquatic reserve.
- ☐ I have checked if the proposed variation will occur within a specially protected area (eg Aquatic Reserve, any area of a Marine Park, Adelaide Dolphin Sanctuary or River Murray Protected Area).
- ☐ If the proposed variation will occur within a specially protected area, I have contacted the relevant authorities to obtain information on any requirements of that area.
- ☐ I have attached any additional supporting paperwork (eg project outline, diagrams, other permits).
- ☐ I have read the Objects of the Act provided in the attachment and I believe my application supports these objectives.

All sections of this form must be completed. If additional space is needed, attach a separate page. Application Forms insufficiently or partially completed and not provided within two weeks of request, will be returned to the applicant.

Completed applications to:

PIRSA FISHERIES & AQUACULTURE

2 Hamra Avenue, West Beach. SA 5024

.....

ADDITIONAL INFORMATION TO SUPPORT YOUR APPLICATION

Please provide any additional information that may support your application, including any social, economic or biological considerations. In particular, please include information to demonstrate how approval of your application would further the objectives of the *Fisheries Management Act 2007* (“the Act”).

The statutory objectives of the *Fisheries Management Act 2007* are set out in section 7. Please refer to the excerpts on page 7 or internet site for further details.

Your application will be assessed against these objectives and must be consistent with fisheries management and protection arrangements that apply under the Act.

Please note that where a proposed activity will take place within the boundaries of a **specially protected area** the proposal should also fit within the objectives of the relevant Act (sub-section 7(4)). For example where a proposed activity will take place within the boundaries of a Marine Park the proposal should also fit within the objectives of the *Marine Parks Act 2007*.

Electronic copies of the *Marine Parks Act 2007*, the *Adelaide Dolphin Sanctuary Act 2005* and the *River Murray Act 2003* can be found at the following internet site:

<http://www.legislation.sa.gov.au/browseActs.aspx>

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

DECLARATION

Full Name of Applicant

I(Natural Person/ Director) *

of (Address)

Contact Telephone Number:

hereby certify that the contents of this variation application is to the best of my knowledge and belief true and accurate. I know that the information provided is to be used for the purpose of the administration of the *Fisheries Management Act 2007* and if it is false or misleading in a material particular (whether by reason of inclusion or omission of any particular) I may be guilty of an offence.

☐ I have completed the checklist on page 1 and addressed all matters

Dated the(day) of (month), 20..... (year)

Witnessed by:
(Full Name)

of
(Address)

Signature of Witness:

*** Evidence may be required to prove authority to act on behalf of the company/organisation.**

Part 2—Objects of Act

7—Objects of Act

- (1) An object of this Act is to protect, manage, use and develop the aquatic resources of the State in a manner that is consistent with ecologically sustainable development and, to that end, the following principles apply:
 - (a) proper conservation and management measures are to be implemented to protect the aquatic resources of the State from over-exploitation and ensure that those resources are not endangered;
 - (b) access to the aquatic resources of the State is to be allocated between users of the resources in a manner that achieves optimum utilisation and equitable distribution of those resources to the benefit of the community;
 - (c) aquatic habitats are to be protected and conserved, and aquatic ecosystems and genetic diversity are to be maintained and enhanced;
 - (d) recreational fishing and commercial fishing activities are to be fostered for the benefit of the whole community;
 - (e) the participation of users of the aquatic resources of the State, and of the community more generally, in the management of fisheries is to be encouraged.
- (2) The principle set out in subsection (1)(a) has priority over the other principles.
- (3) A further object of this Act is that the aquatic resources of the State are to be managed in an efficient and cost effective manner and targets set for the recovery of management costs.
- (4) The Minister, the Director, the Council, the ERD Court and other persons or bodies involved in the administration of this Act, and any other person or body required to consider the operation or application of this Act (whether acting under this Act or another Act), must—
 - (a) act consistently with, and seek to further the objects of, this Act; and
 - (b) insofar as this Act applies to the Adelaide Dolphin Sanctuary, seek to further the objects and objectives of the *Adelaide Dolphin Sanctuary Act 2005*; and
 - (c) insofar as this Act applies to the River Murray, seek to further the objects of the *River Murray Act 2003* and the *Objectives for a Healthy River Murray* under that Act; and
 - (d) insofar as this Act applies to areas within a marine park, seek to further the objects of the *Marine Parks Act 2007*.
- (5) For the purposes of subsection (1), **ecologically sustainable development** comprises the use, conservation, development and enhancement of the aquatic resources of the State in a way, and at a rate, that will enable people and communities to provide for their economic, social and physical well-being while—
 - (a) sustaining the potential of aquatic resources of the State to meet the reasonably foreseeable needs of future generations; and
 - (b) safeguarding the life-supporting capacity of the aquatic resources of the State; and
 - (c) avoiding, remedying or mitigating adverse effects of activities on the aquatic resources of the State,

(taking into account the principle that if there are threats of serious or irreversible damage to the aquatic resources of the State, lack of full scientific certainty should not be used as a reason for postponing measures to prevent such damage).
