Conservation Collaboration

Conservation Collaboration

Zoos SA is a not-for-profit conservation charity, with revenue generated through admissions, annual memberships, donors, and corporate partnerships.

Partnerships play a vital role in enabling our work, bringing together organisations from a diverse range of sectors to support conservation, animal welfare, and visitor experiences.

We collaborate with partners in meaningful and practical ways, with each partnership designed to deliver shared value. Together, these partnerships highlight the breadth and impact of our network. While each collaboration is unique, all are united by a shared commitment to protecting wildlife, enhancing visitor experiences, and driving positive conservation outcomes

Grapes for good

A collaboration with purpose

‘Grapes for good’ is proof that wine can be a force for good. Every drop can go a little further and make a real difference.

Every sip of Grapes for Good helps support Zoos SA’s conservation efforts, protecting threatened species and supporting vital work at Monarto Safari Park’s Wild Africa™ precinct—creating hope for wildlife at risk of extinction.”

With more than 70% of the species in Wild Africa™ threatened with extinction in the wild, your support is vital and keeps the fight to save these species from extinction alive.

From little things...

Partnerships grow and evolve.

Grapes for Good evolved from a single partnership with Kimbolton wines into the four-winery partnership that it is today.

...big things grow.

Langhorne Creek Road

Cheetah partnership with Kimbolton Wines
